

## 04.3 - Avg Grade

Write a program that asks the user to enter a valid score five times. The program should display a letter grade after each score is entered. After all the scores are entered, it should display the average of the scores and the letter grade corresponding to that average.

Complete your program by writing the following three functions and calling them from within your main function.

**get\_valid\_score** This function should ask the user to enter a score. If the score is less than 0 or greater than 100, the function should ask the user to re-enter a score, until the user enters a valid one. Finally, the function returns the valid score.

**calc\_average** This function should accept a list of scores as its argument and return the average of the scores.

**determine\_grade** This function should accept a score as an argument and return a letter grade for the score based on the grading scale in Table 1a.

Score	Grade	Input	Output	Input	Output
		Score	Grade	Score	Grade
[92 – 100]	A	89	B	93	A
[82 – 92)	B	75	C	–7	Invalid Input.
[73 – 82)	C	91	B	101	Invalid Input.
[64 – 73)	D	82	B	100	A
[0 – 64)	F	64	D	0	F
(a)		Average	80.20	82	B
		Grade	C	65	D
		(b)		Average	68.00
				Grade	D
				(c)	

Table 1: The grading scale (a), and two test cases (b), and (c) for exercise 04.3.

Test your program with the data in Tables 1b and 1c. Finally, format your program to match the sample output, character for character, including all white space and punctuation. User input in the sample has been highlighted in **Pappy's Purple** to distinguish it from the program's output, but your user input does not need to be colored. Save your program as `avg_grade_login.py`, where `login` is your Purdue login. Then submit it along with a screenshot showing a run of **both** test cases.

## Terminal

```
$ python avg_grade_login.py
Enter a score: 93
    The letter grade for 93.0 is A.
Enter a score: -7
    Invalid Input. Please try again.
Enter a score: 101
    Invalid Input. Please try again.
Enter a score: 100
    The letter grade for 100.0 is A.
Enter a score: 0
    The letter grade for 0.0 is F.
Enter a score: 82
    The letter grade for 82.0 is B.
Enter a score: 65
    The letter grade for 65.0 is D.

Results:
    The average score is 68.00.
    The letter grade for 68.00 is D.
